

LASEMD AMPOULE SERIES

•Lasemd Ampoule Series:

Name of Ampoule	Major Ingredient	Content	Indication
VC	Ascorbic Acid(Vitamin C)	10%	Brightening Anti Aging
VA	Retinol(Vitamin A)	2,500iu	Wrinkles
TA	Tranexamic Acid	1.2%	Whitening Redness
RS	Resveratrol	7%	Whitening AntiAging
SC	Human cord blood Cell Conditioned Media	20%	Rejuvenation
CK	Human cord blood Cell Conditioned Media + KGF + Genestein	20%	Rejuvenation Hair Loss Hair Regrowth

VC AMPOULE

- Vitamin C (VC) is one of the strongest antioxidants in nature which preserves the youthful nature of skin, by essentially maintaining the health of the collagen matrix through combating oxidative stress. Advanced technology can now ensure its stability and permeation into the skin.
- Key words
 - MNG (Multi Nanosome Granulated) Technology
 - Nano Sized Ascorbic Acid with multiple liposome layers
 - Whitening, Anti sun damage
 - Extreme low molecule HA
- Only 8 ingredients

Total ingredients

Purified water(Aqua)	Ascorbic acid	Mannitol	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)
----------------------	---------------	----------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------

VA AMPOULE

- Vitamin A (VA), and more specifically, retinoic acid, is the one and only material in nature to really redress the effects of aging on your skin, and turn back the clock. The volume of corroborative scientific data overwhelms other materials, assuring its quality to enable ‘true’ skin rejuvenation.
- Key words
 - MNG (Multi Nanosome Granulated) Technology
 - Nano Sized Retinol with multiple liposome layers
 - Rejuvenation, Wrinkle, Acne
 - Extreme low molecule HA
- Only 8 ingredients

Total ingredients

Purified water(Aqua)	Mannitol	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)	Retinol
----------------------	----------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------	---------

TA AMPOULE

- Tranexamic Acid (TA) has been systemically used for decades to help wound recovery after plastic surgery.
- As an incidental benefit, doctors and scientists found it also brightened the skin! MNG™ technology has finally fulfilled the long sought-after scientific goal: a stable topical application, until now very difficult to find.
- Key words
 - MNG (Multi Nanosome Granulated) Technology
 - Nano Sized Tranexamic Acid with multiple liposome layers
 - Whitening, Redness
 - Extreme low molecule HA
- Only 8 ingredients

Total ingredients

Purified water(Aqua)	Mannitol	Tranexamic Acid	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)
----------------------	----------	-----------------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------

LASEMD – EXCLUSIVE LINE

RS (Resveratrol)

Resveratrol is a type of natural polyphenol, and a phytoalexin produced naturally by several plants in response to injury or when the plant is under attack by pathogens such as bacteria or fungi.

Lasemd RS Ampoule is containing 7% of prime grade Resveratrol(99% purity) nano powder which is almost equal to the resvetrol content of more than 500 bottles of wine.

The ingredient is expected to help prevent against UV-related skin carcinogenesis and photo aging.

SC (Human Cord Blood Cell Conditioned Media)

This special combination has been developed to provide abundant peptides from stem cell media. In the 20% of media, a lot of peptides including EGF, TFG-b, Fibronectin, HGF, KGF, VEGF, PDGF, FGF-2, Collagen are mainly found. The peptides are known as growth factors for skin and hair.

CK (Human Cord Blood Cell Conditioned Media + KGF+ Genestein)

Based on excellent stem cell technology, the CK ampoule has been designed especially for the hair loss, KGF and Genestein are added more which are also known as helping hair growth component.

RS AMPOULE

- Resveratrol is a type of natural polyphenol, and a phytoalexin produced naturally by several plants in response to injury or when the plant is under attack by pathogens such as bacteria or fungi.
- Key words
 - 7% of prime grade Resveratrol(99% purity) nano powder → >500 bottles of wine.
 - Whitening
 - Acne
 - Pore reduction
 - Extreme low molecule HA
 - Only 7 ingredients.

Total ingredients

Resveratrol Nano powder	Purified water(Aqua)	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)
-------------------------	----------------------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------

SC AMPOULE

- Lasemd SC ampoule is designed with cutting edge Stem Cell technology to rejuvenate skin from inside.
- Key words
 - Stem Cell Technology
 - Rejuvenation
 - Growth Factors : EGF, TFG-b, Fibronectin, HGF, KGF, VEGF, PDGF, FGF-2, Collagen
 - Kangstem Biotech : The leading company with best stem cell technology
 - Extreme low molecule HA
- Only 8 ingredients

Total ingredients

Purified water(Aqua)	Mannitol	Stem Cell Conditioned Media (20%)	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)
----------------------	----------	-----------------------------------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------

CK AMPOULE

- Lasemd CK ampoule is designed with cutting edge Stem Cell technology to help hair regrowth.
- Key words
 - Stem Cell Technology
 - Hair treatment
 - Genistein
 - Enhanced KGF
 - Growth Factors : EGF, TFG-b, Fibronectin, HGF, KGF, VEGF, PDGF, FGF-2, Collagen
 - Kangstem Biotech
 - Extreme low molecule HA
- Only 9 ingredients

Total ingredients

Purified water(Aqua)	Mannitol	Genistein	Stem Cell Conditioned Media (20%)	Scutellaria baicalensis Root extract	Paeonia Suffruticosa root extract	Glycerin	Hydrolyzed Sodium Hyaluronate (Low Molecule HA)	Sodium Hyaluronate (high molecule HA)
----------------------	----------	-----------	-----------------------------------	--------------------------------------	-----------------------------------	----------	---	---------------------------------------
